PROFILES

Aluminium extruded profiles

PEKP 52 profile height: 52mm
thickness: 13mm

PEKP 77 profile height: 77mm
thickness: 18.5mm

PEKP 80 profile height: 80mm
thickness: 18.5mm

PE 41 profile height: 41mm
thickness: 8.5mm

PE 55 profile height: 55mm
thickness: 14mm

PE 100 profile height: 100mm
thickness: 25mm

Aluminium profiles filled with CFC-free foam with or without perforations

PA 52 profile height: 52mm
thickness: 13mm

PA 55 profile height: 55mm
thickness: 14mm

PA 77 profile height: 77mm
thickness: 18.5mm

**SAFETY
AND COMFORT**

SUPPLEMENTARY PROFILES

PEK 52 profile height: 52mm
thickness: 13mm

PEK 77 profile height: 77mm
thickness: 18.5mm

PER 77 profile height: 77mm
thickness: 18.5mm

PEK 80 profile height: 80mm
thickness: 18.5mm

PEK 80 profile height: 80mm
thickness: 18.5mm

PEK 100 profile height: 100mm
thickness: 18.5mm

WHY CHOOSE ROLLING DOORS

Durable

Profiles are made of high-grade aluminium sheet protected by two-layers of coating with enhanced resistance to abrasion and weather conditions.

Thermally and Acoustically Insulated

Thanks to the filling foam, profiles feature good thermal and sound insulating performances.

Ventilation / Natural Light

Sufficient amount of fresh air and natural light can be provided by using supplemental ventilation or glazed profiles.

Secure

Rolling garage doors are resistant to impact or any kind of breach providing the utmost property security.

EASE OF USE

Roller garage doors can be operated with a remote controlled motor which enables you to open and close them from inside your car or house. They could also be manually operated where the electricity is an issue.

SPACE SAVING

No need to reserve sweep area for the hinged doors.

Unlike with a tilting door, the overhead space in the garage may be kept clear with a rolling door.

Ideal for short driveways and tight garages where you can approach right to the edge.

INSTALLATION OPTIONS

**HIGH QUALITY
AND AESTHETICS**

Garage doors can be mounted in existing facilities as well as in those that are being built. Depending on the overall dimensions and conditions of installation, it is possible to make the installation on brackets or in a box.

Rolling door rails can be mounted flush with the wall or they can be installed inside or outside the garage walls.

Roller shutter garage doors fall into two categories: BGR/KNB (sitting on brackets) and BGR/SK (in a box) with regard to the fitting the winding tube.

BGR/KNB

BGR/SK

MAXIMUM DIMENSIONS

Maximum dimensions for areas marked as wind zone 1
